

40. Draw Rectangular Shape and Extract Objects

AIM

To draw a rectangular shape around an object and extract the selected object from an image using OpenCV.

CODE

```
import cv2

img = cv2.imread(r"C:\Users\chait\OneDrive\Documents\Desktop\cv lab image.jpg")

# Draw rectangle
cv2.rectangle(img, (50, 50), (300, 300), (255, 0, 0), 2)

# Extract object
object_img = img[50:300, 50:300]

cv2.imshow("Rectangle", img)
cv2.imshow("Extracted Object", object_img)

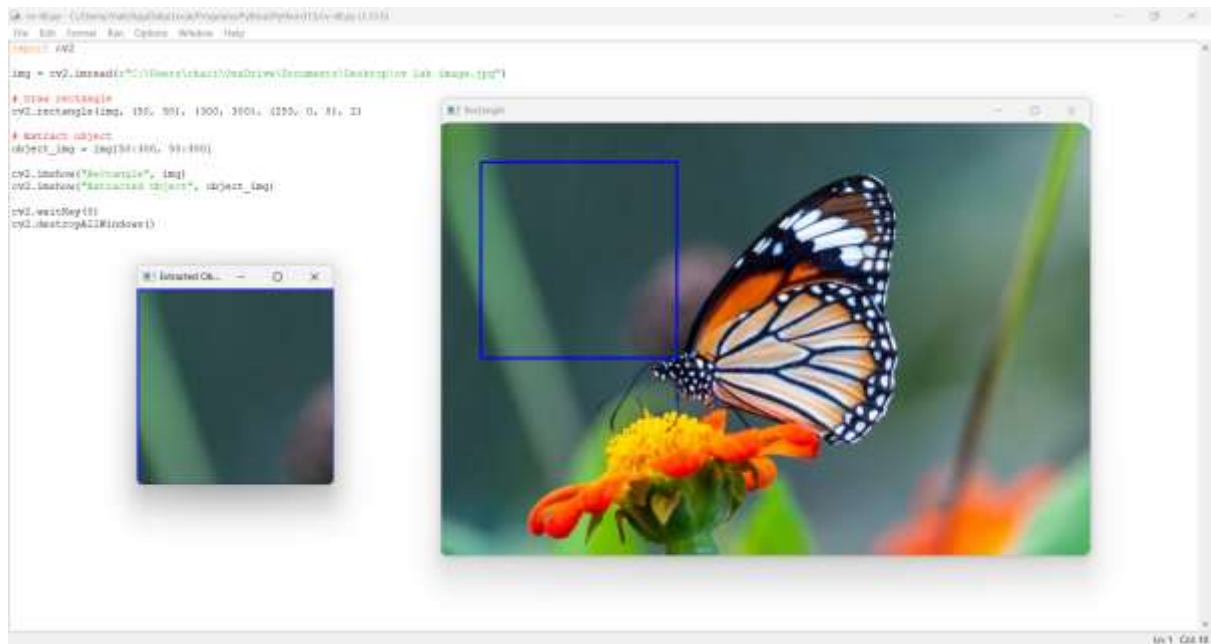

cv2.waitKey(0)
cv2.destroyAllWindows()
```

INPUT

An image containing an object to be extracted.

OUTPUT

1. Image with a **rectangle around the selected region**.
2. The selected region displayed separately as the **extracted object**.

RESULT

Thus, a rectangular region was successfully drawn and the selected object was extracted from the image using OpenCV.
