

Experiment 1: Read an Image and Convert it to Grayscale

Aim

To perform basic image handling by reading an image and converting it into a grayscale image using OpenCV.

Procedure

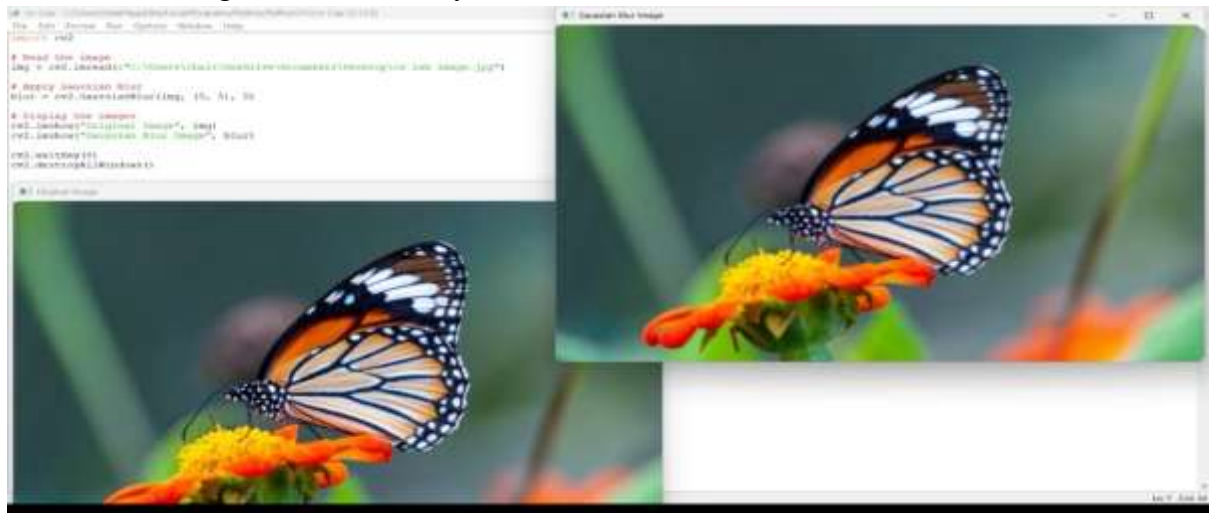

1. Import the OpenCV library.
2. Read the input image.
3. Display the original image.
4. Convert the image into grayscale.
5. Display the grayscale image.
6. Close all windows.

Code:

```
import cv2  
  
img = cv2.imread("image.jpg")  
cv2.imshow("Original Image", img)  
  
gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)  
cv2.imshow("Grayscale Image", gray)  
  
cv2.waitKey(0)  
cv2.destroyAllWindows()
```

Output:

Result: The image was successfully read and converted in

to a grayscale image.
