

Experiment 4: Image Dilation

Aim

To perform image dilation using OpenCV.

Procedure

1. Read the image.
2. Create a kernel.
3. Apply dilation.
4. Display the output.

Code:

```
import cv2

import numpy as np

img = cv2.imread("image.jpg")

kernel = np.ones((5,5), np.uint8)

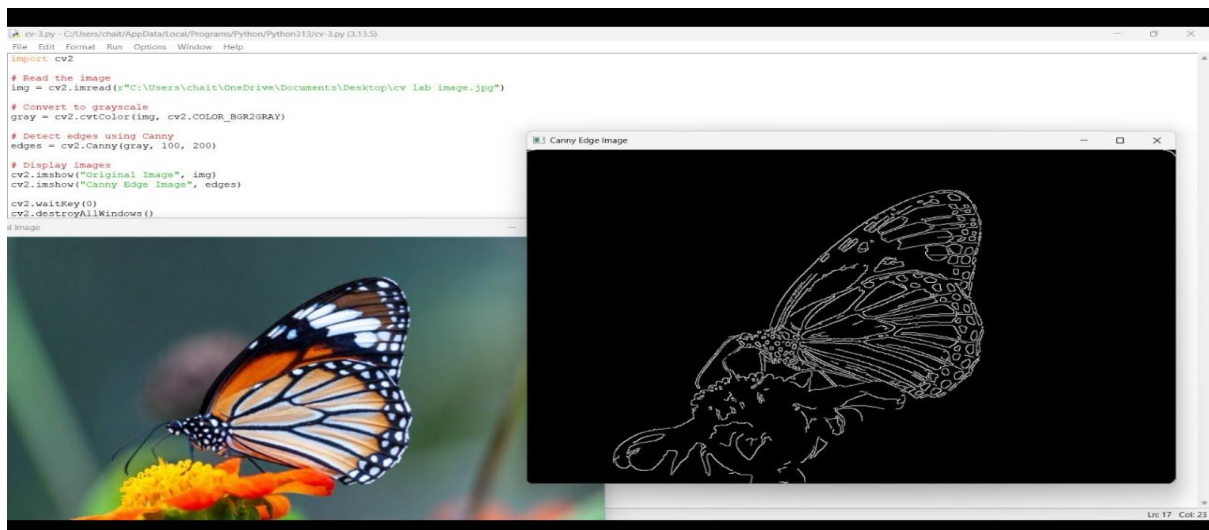

dilate = cv2.dilate(img, kernel, iterations=1)

cv2.imshow("Dilated Image", dilate)

cv2.waitKey(0)

cv2.destroyAllWindows()
```

Output:

Result: The image was successfully dilated.
