

Experiment 5: Image Erosion

Aim

To perform erosion on an image using OpenCV.

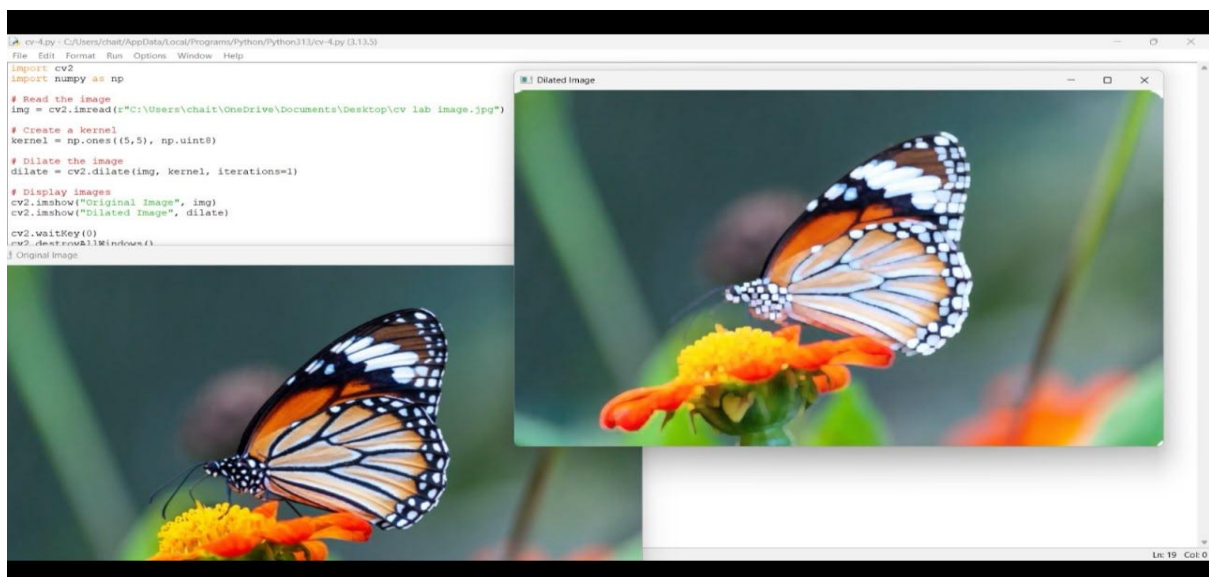

Procedure

1. Read the image.
2. Create a kernel.
3. Apply erosion.
4. Display the output.

Code:

```
import cv2
import numpy as np
img = cv2.imread("image.jpg")
kernel = np.ones((5,5), np.uint8)
erode = cv2.erode(img, kernel, iterations=1)
cv2.imshow("Eroded Image", erode)
cv2.waitKey(0)
cv2.destroyAllWindows()
```

Output:

Result: The image was successfully eroded.
