

Experiment 8: Scaling an Image

Aim

To resize an image into bigger and smaller sizes using OpenCV.

Procedure

1. Import OpenCV.
2. Read the input image.
3. Resize the image to a larger size.
4. Resize the image to a smaller size.
5. Display both resized images.

Code:

```
import cv2

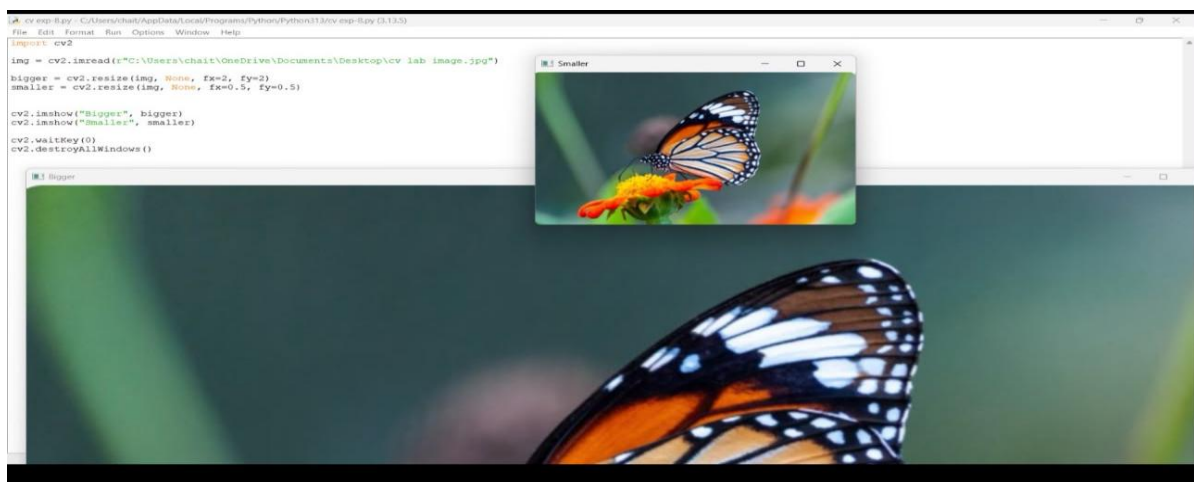

img = cv2.imread("image.jpg")
big = cv2.resize(img, (800, 600))
small = cv2.resize(img, (300, 200))

cv2.imshow("Original", img)
cv2.imshow("Bigger", big)
cv2.imshow("Smaller", small)

cv2.waitKey(0)

cv2.destroyAllWindows()
```

Output:

Result: The image was successfully resized into bigger and smaller sizes.
