

26. Insert Watermark to the Image using OpenCV

AIM

To insert a text watermark into an image using OpenCV.

PROCEDURE

1. Read the input image.
2. Define the watermark text and its position.
3. Use cv2.putText() to add the watermark.
4. Display the watermarked image.

PROGRAM

```
import cv2

# Read image
img = cv2.imread(r"C:\Users\chait\OneDrive\Documents\Desktop\cv lab image.jpg")

# Add watermark
cv2.putText(img, "CHAITRA", (50, 50),
            cv2.FONT_HERSHEY_SIMPLEX, 1,
            (255, 255, 255), 2)

# Display image
cv2.imshow("Watermarked Image", img)

cv2.waitKey(0)
cv2.destroyAllWindows()
```

OUTPUT

The image is displayed with the text **CHAITRA** as a watermark.

Explanation

We used `cv2.putText()` to insert text onto the image. The text acts as a watermark and can be positioned anywhere on the image.
